

**What you said**

**Key messages are as follows:**

- Need to consider having a stronger message on Carers for Older adults within the document
- There should be more mentioned around intergenerational work between older adults and young people

**Other points include:**

- Changing the wording of the first ambition “heart of community leadership” to something more appropriate
- Need more adult education courses for the elderly
- Care for older adults within their home should be 24 hours if needed not just within normal working hours.

**What we did**

- Carers are now covered in the healthier communities and adults section
- Reference to intergenerational work have now been included
