Small Environmental Improvement Budgets 2007/2008

SUMMARY

The purpose of this report is to inform existing members on the approach to the allocation and use of the Council's Environmental Improvements Budget.

WHEN WILL THIS FUNDING BE AVAILABLE?

A Capital bid has been agreed for £800,000 for the next two years (2007/08 & 2008/09) to fund small environmental improvements. This funding is split £400,000 per year.

Project request forms will be sent out to ward member's week commencing 14th May 2007 and the bulk of the programme of works for the first year is hoped to be finalised by end of June 2007. See Appendix A for a timetable.

WHY IS THE TIMESCALES FOR THE PROGRAMME AS IT IS?

Although some dates have been indicated these are not set in stone. It is recognised that some projects will require members to carry out additional consultation and development with the local community; the timescales will be flexible in these incidents.

The earlier projects can be agreed, the earlier in the programme they can be implemented - providing a 'quick win' for the local community.

WHAT WILL THE SMALL ENVIRONMENTAL IMPROVEMENT BUDGET FUND?

The definition of small environmental improvements can be generalised into those affecting the fabric of the floorscape and those impacting upon the quality of the visual environment, i.e. small engineering scheme to improve the function of the space on or adjacent the highway or small projects to improve the visual amenity. Examples of projects can be found in Appendix B

HOW IS THE FUNDED ALLOCATED ACROSS THE BOROUGH?

The Small Environmental Improvement Budget has been divided between wards on the basis of population per ward, as indicated in Appendix C

HOW WILL PROJECTS BE PUT FORWARD?

Ward members are requested to put forward project ideas by completing a project request form. Officers from Technical Services/Direct Services will then assess these project ideas to determine their feasibility and eligibility for this programme. Ward members will be kept updated with progress with each request.

MEETING COMMUNITY NEED

If the project ideas are deemed to be feasible; to ensure that the project meet the needs and aspirations of the local community, ward members will be asked to supply evidence of robust consultation. This could be in the form of submitted petitions, letters from residents or a questionnaire survey. A template questionnaire will be included with the project request forms.

A fee will be charged if council officers are requested to carry out this consultation, this will be deducted from the wards funding allocation.

WHAT IF MORE THAN ONE IDEA IS SUGGESTED FOR A WARD OR A PROJECT EXCEEDS THE AVAILABLE WARD BUDGET?

If there is more than one eligible project for a ward it is the responsibility of the ward members to prioritise the projects.

If ward members cannot reach a decision as to which projects are to be carried out the Cabinet member for Regeneration or the Environment will make the final decision with technical advise from relevant officers.

WHAT IF A PROJECT IDEA EXCEEDS THE AVAILABLE WARD BUDGET?

If a project is requested that exceeds the wards available budget it could be programmed to be carried out across into the next financial year, thus using the wards allocation of funding for 2008/09.

WHO WILL DESIGN, MANAGE AND CARRY OUT THE WORKS?

Appropriate officers within Technical Services or Direct Services will produce design plans if required and manage the delivery of the schemes.

The council's Direct Services will carry out the implementation of the schemes. If work programmes warrant it, external contractors will be commissioned to carry out schemes under standard procurement procedures.

IS THERE OTHER FUNDING AVAILABLE TO CARRY OUT ADDITIONAL ENVIRONMENTAL IMPROVEMENTS?

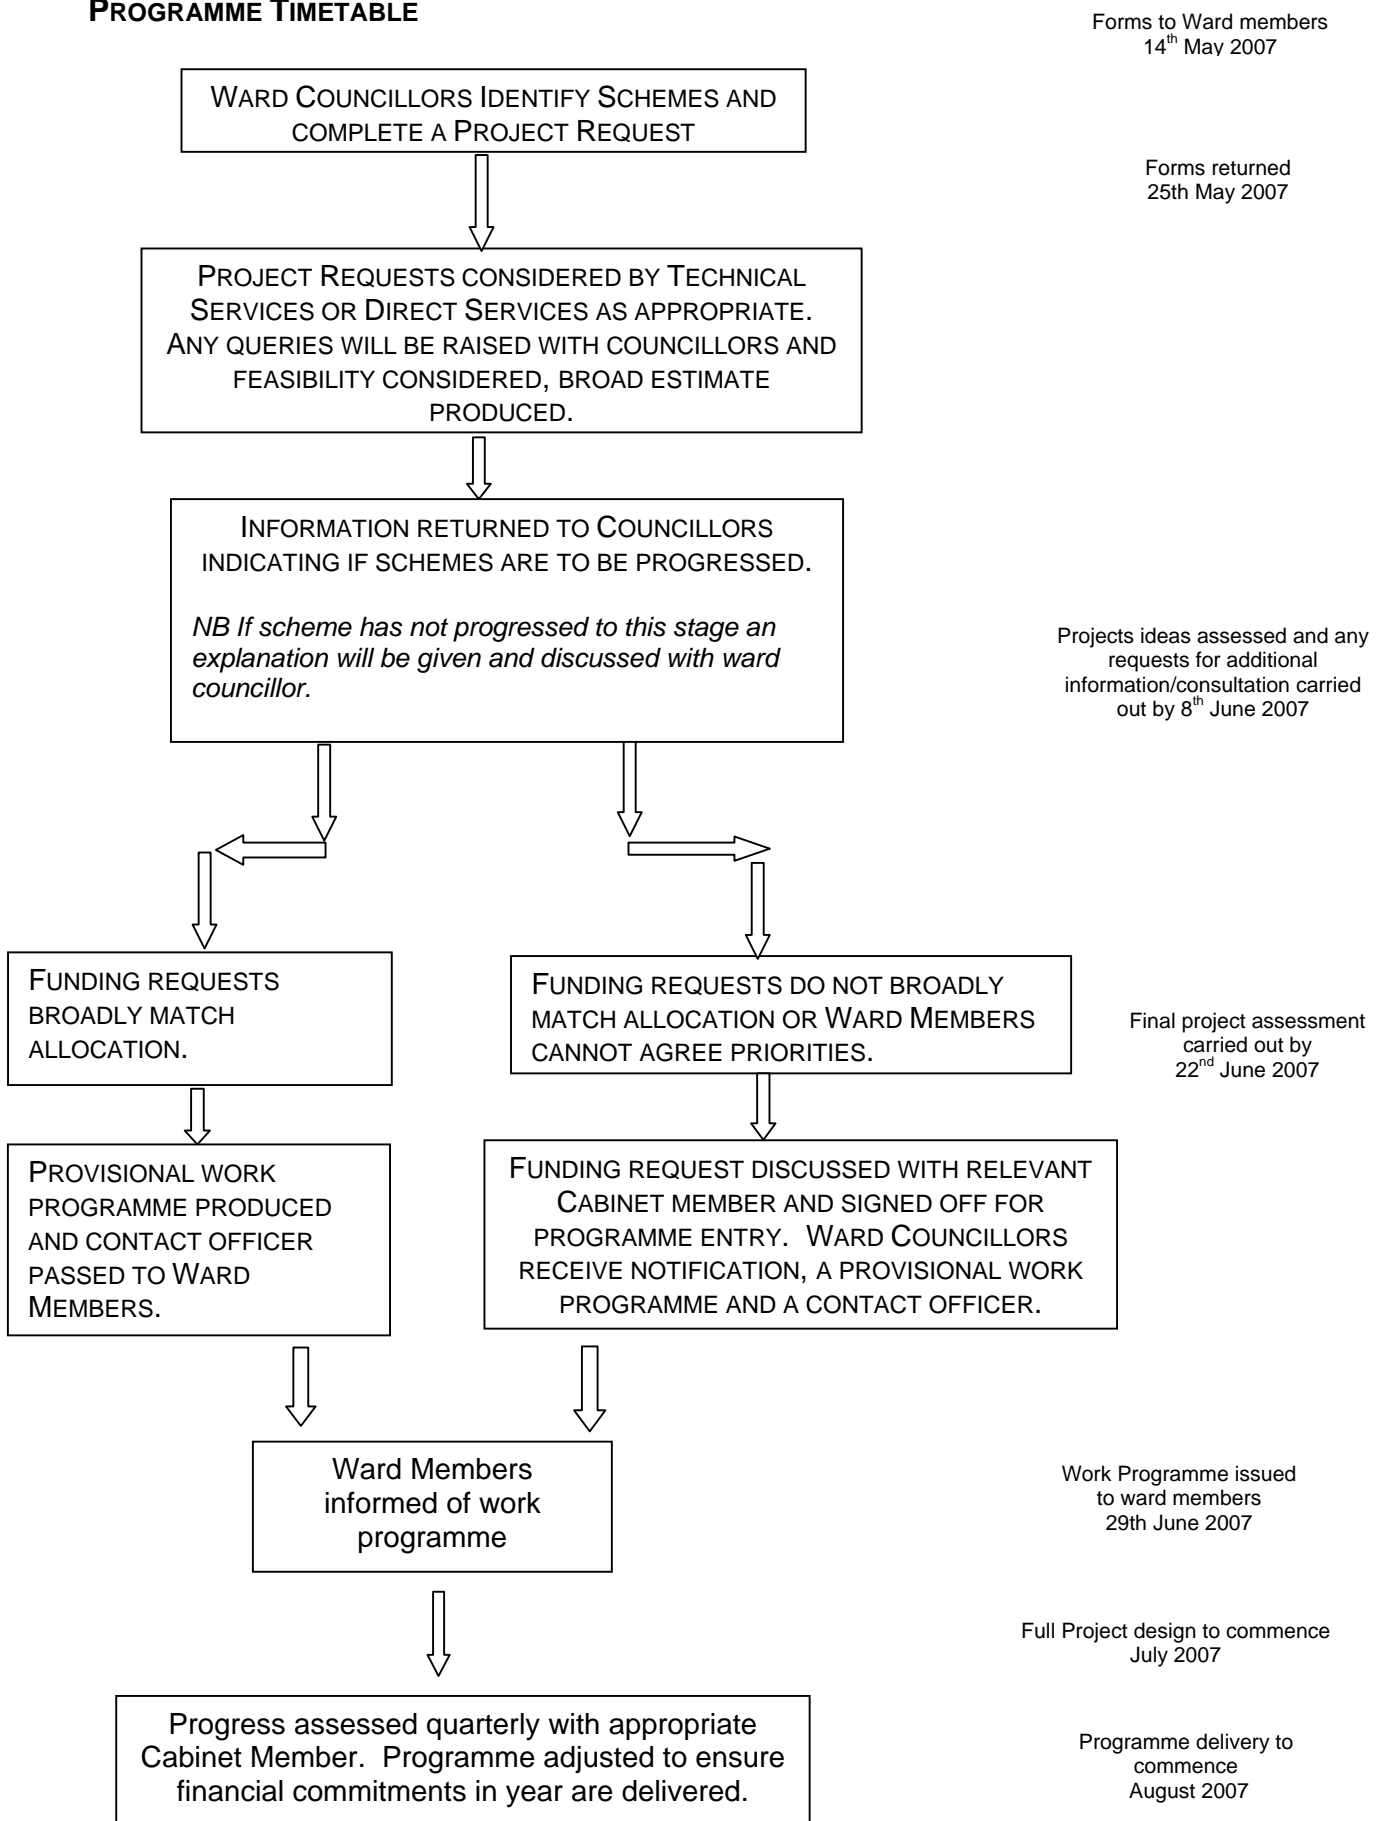

Tristar Homes have allocated a small budget to each of its Areas to carry out Environmental improvements that have been requested by its tenants.

Capital Funding has been allocated to each Area Transport Strategy Steering Group

It is suggested that Ward Councillors contact the Tristar Area Managers and the Chairs of the Area Transport Strategy Steering Groups to determine if there is scope for matching funding of priorities projects.

Appendix A

PROGRAMME TIMETABLE

Appendix B

EXAMPLES OF ELIGIBLE SCHEMES

- ❑ Parking Bays and Lay-bys
- ❑ Verge parking Treatment
- ❑ Verge Repair
- ❑ New traffic islands/bollards
- ❑ Footpaths along desire lines
- ❑ New lighting schemes (small number of columns)
- ❑ Bus lay-bys
- ❑ Replacement of old bench seats
- ❑ New /Repair fencing and handrails
- ❑ Renew traffic islands
- ❑ Replace concrete bollards with steel
- ❑ New shrub planting and seats*
- ❑ Roundabout displays*
- ❑ Replace dwindling trees*
- ❑ New dog waste bins
- ❑ New Litter Bins
- ❑ Hanging baskets*
- ❑ Reinstatement of grass verges
- ❑ Gating Orders
- ❑ Floral displays*
- ❑ Removal of unnecessary signs and poles

* These projects will have an ongoing revenue implication, which may have to be accounted for from the ward allocation.

Due differing circumstances on location it is not possible to provide rough cost estimates for some of these items, e.g. cost of installing a car-parking bay. A list of previously suggested schemes is attached. (Appendix D)

However some of the items are fixed costs

A litter bin = £400

A dog bin = £400

A new lighting column with lamp unit = £600 - £1,200 (£850 average)

The types of schemes that **would not** normally qualify for the Small Environmental Improvements Budget are: -

- Salt Bins / additional gritting
- Traffic Calming
- Pedestrian Crossings
- Traffic Management Schemes
- Cycleways
- Building facade improvements
- Demolitions
- Revenue Projects (e.g. street wardens)
