Note: 2019 data is currently only available for Stockton and Tees Valley area.

Children who started to be looked after during the year ending 31 March, by local authority 2014-2019

Source: SSDA 903 and where available locally sourced provisional data for 2019

1. England and regional totals have been rounded to the nearest 10. See looked after children statistics guide for more information on rounding.
 2. Only the first occasion on which a child started to be looked after in the year has been counted.
 3. Figures exclude children looked after an agreed series of short term placements.
 4. Historical data may differ from older publications. This is mainly due to the implementation of amendments and corrections sent by some local authorities after the publication date of previous materials.
- x Figures not shown in order to protect confidentiality. See looked after children statistics guide for information on data suppression.

Children who ceased to be looked after and the number and percentage adopted during the year ending 31 March, by local authority 2014-2019

Source: SSDA 903 and where available locally sourced provisional data for 2019

1. England and regional totals have been rounded to the nearest 10. Other numbers have been rounded to the nearest 5. Percentages have been rounded to the nearest whole number. See looked after children statistics guide for more information on rounding.
2. Historical data may differ from older publications. This is mainly due to the implementation of amendments and corrections sent by some local authorities after the publication date of previous materials.
3. For some local authorities, such as Kent, the figures may be impacted by significant numbers of unaccompanied asylum seeking children.
4. Only the last occasion on which a child ceased to be looked after in the year has been counted.
5. Percentages based on the number of children that ceased to be looked after during the year.

Care leavers aged 19, 20 and 21 by activity at 31 March, by local authority 2018-2019

Source: SSDA 903 and where available locally sourced provisional data for 2019

1. England and regional totals have been rounded to the nearest 10. Percentages have been rounded to the nearest whole number. See looked after children statistics guide for more information on rounding.
 2. Figures exclude children who were looked after under an agreed series of short term placements, those who have died since leaving care, and those who have returned home to parents or someone with parental responsibility for a continuous period of at least 6 months and those whose care was transferred to another local authority. (For more information see the looked after children statistics guide.)
 3. For some local authorities, such as Kent, the figures may be impacted by significant numbers of unaccompanied asylum seeking children.
- x Figures not shown in order to protect confidentiality. See looked after children statistics guide for information on data suppression.

Children looked after who were missing or away from placement without authorisation, by local authority 2018-2019

- Source: SSDA 903 and where available locally sourced provisional data for 2019
1. Missing is defined as a looked after child who is not at their placement or a place they are expected to be (e.g. school) and their whereabouts is not known.
 2. Away from placement without authorisation is defined as a looked after child whose whereabouts is known but who is not at their placement or place they are expected to be and the carer has concerns or the incident has been notified to the local authority or the police.
 3. In 2017 and 2018, some local authorities informed the department that they do not record incidents as 'away without authorisation' but instead report all incidents as 'missing' to maintain consistency with local police reporting. We estimate this could mean an overestimate of missing incidents of up to 3% in 2017 and up to 8% in 2018; and an undercount of away without authorisation incidents of up to 6% in 2017 and up to 18% in 2018. These estimates vary by region. However, some of these local authorities submitted 'away without authorisation' information and this has been included in the table. See the looked after children statistics guide for more information.
 4. England and regional totals have been rounded to the nearest 10. Percentages have been rounded to the nearest whole number. Averages have been rounded to one decimal place. See looked after children statistics guide for more information on rounding.
 5. For some local authorities, such as Kent, the figures may be impacted by significant numbers of unaccompanied asylum seeking children.
 6. This is the fourth year these statistics have been collected in this way, and local authorities have reported some variation over recent years in how these incidents are recorded. We will continue to assess whether the figures are considered robust enough to be classed as national statistics, rather than experimental.
 7. Includes children who were missing or away from placement at 1 April 2017, therefore carried over from previous years.
 8. The average number of missing or away from placement incidents for each looked after child with at least one incident during the year.
 9. Children who had more than one missing or away from placement incident which started during the year ending 31 March 2018.
 10. Leicester were unable to provide missing data for 2018. No attempt has been made here to estimate their data.

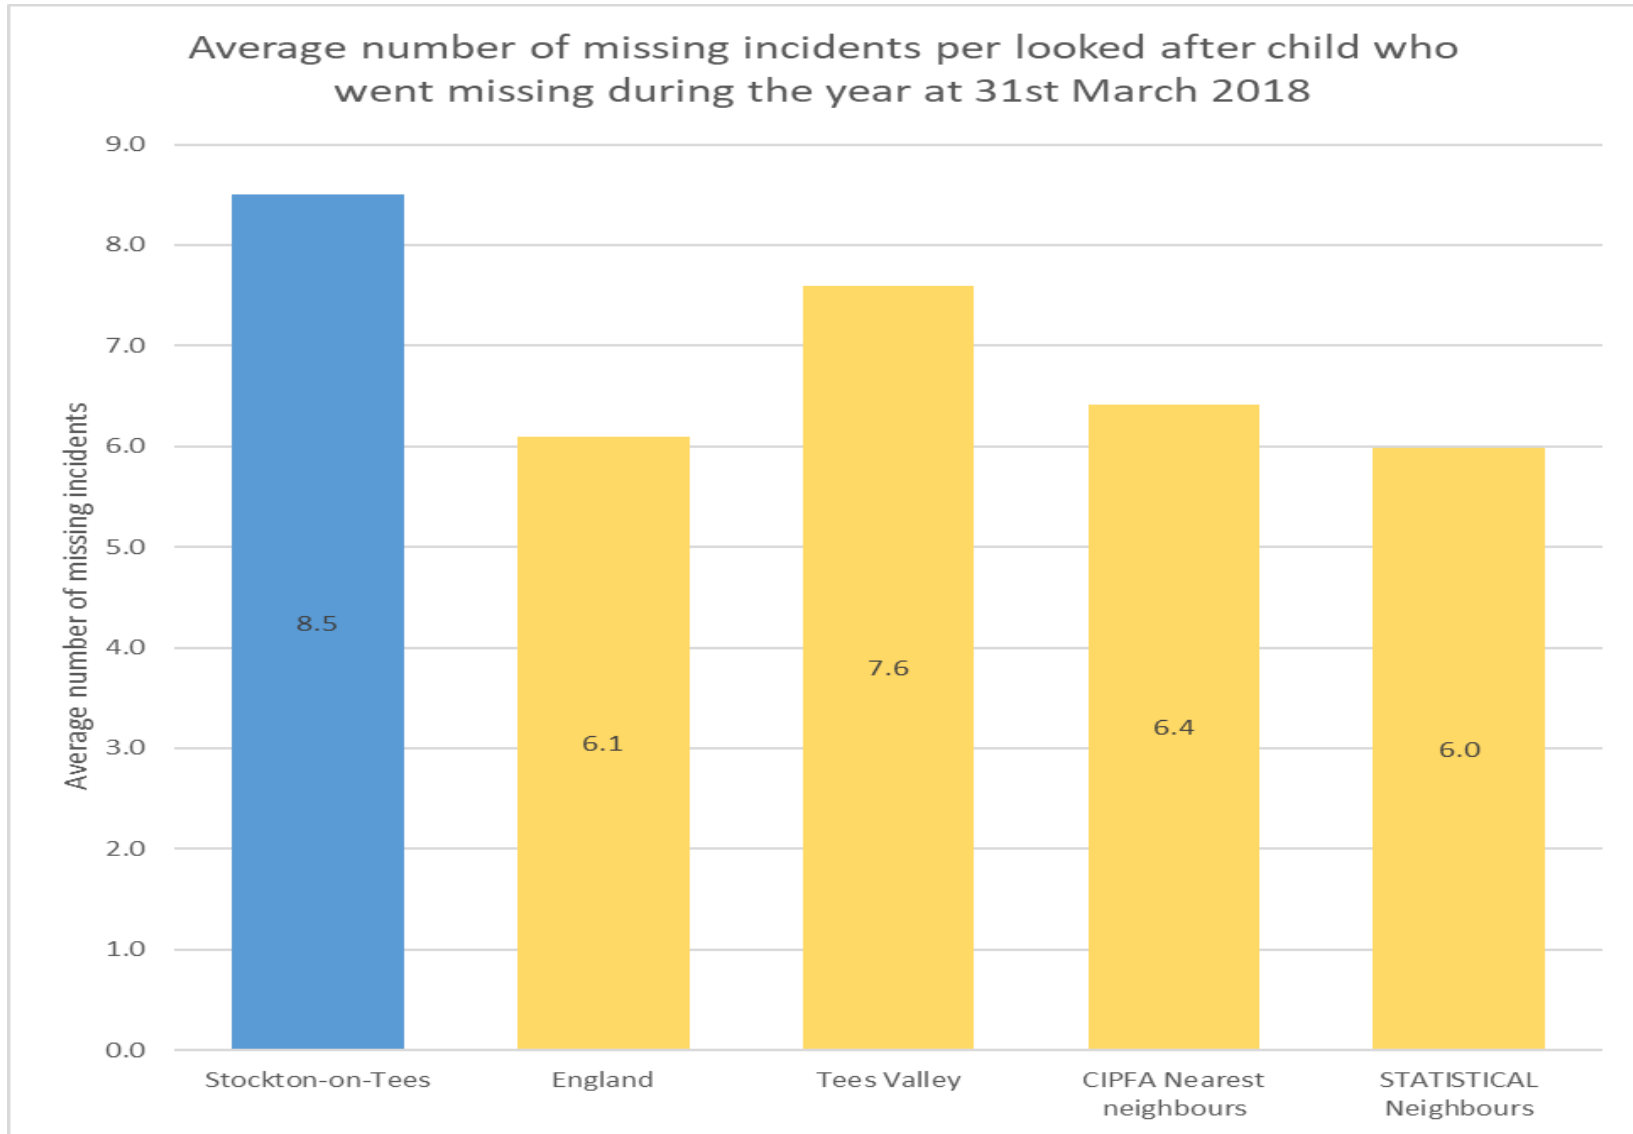

Users should exercise caution when summing the number of missing periods and away from placement without authorisation periods together. This is because a missing period could end one day when the child's whereabouts is discovered, but an away from placement without authorisation period may follow straight after if it is the case that the child did not return to their placement, but their whereabouts was known. This would be one continuous period away from their placement for the child, not two separate incidents.
