

Polling District and Places Review 2014

Returning Officer's Final Proposals following Consultation

Background

Within each Local Authority area, legislation requires Councils to carry out reviews of Polling Districts and Polling Places in that area.

The recent Electoral Registration & Administration Act 2013 changed the timing of these reviews and the next review must be held between 1 October and 31 January 2015 with subsequent reviews held within a 16 month period starting on 1 October every fifth year after 1 October 2013.

The Council's last review was held in 2011 when a number of minor changes were made.

A Council's area is divided into polling districts with one or more districts making up a ward, with a polling place being the area or building within a polling district in which a polling station is situated. Consequently, it is inevitable that polling stations are also considered as part of these reviews.

The review has considered:

- The boundaries of polling districts – for example, are they well defined? Do they follow natural boundaries? Are there suitable transport links? Are there any obstacles to crossing polling district boundaries?
- Polling Places – the location, size and accessibility of the polling place and its availability now and in the future
- Polling Stations – the suitability and accessibility of the room or area for use as a polling station

During the European Elections 2014, the opportunity was taken to complete the Electoral Commission's evaluation templates in order to assess the suitability/ accessibility of the polling place/ station. Presiding Officers were also asked to record any complaints/ comments received.

Tees Valley Unlimited has also provided electorate projections for the current polling district boundaries in each year and up to December 2018. This takes into account new housing and demolitions.

The following tables summarise the existing arrangements, key issues identified from the recent European Elections and any notable projected changes in electorate. There were a number of more detailed comments from the European Elections in relation to individual polling stations in relation to improving accessibility/ privacy of voting. These detailed observations are not included within the schedule but will be taken into account in the planning for future electoral events. Mobile polling stations continue to be used where no alternative venues can be found. Mobiles stations are expensive and unpopular with voters and suggestions for alternative venues are always welcomed. Unfortunately, many schools do not co-operate in making school premises available for polling stations. The proposals take into account Electoral Commission Guidance that the number of electors allocated to a particular polling station should not exceed 2,500. The Returning Officer's final proposals/ comments are included below in relation to the polling districts and places within each ward taking into account consultation feedback.
