

Number	Recommendation	Responsibility	Anticipated Completion Date/ Completion Date
1	That the current green waste collection service is sustained, with a delivery plan to roll it out across the whole Borough.	J McCann	Apr-08
3	That an extensive programme of consultation and presentations be arranged throughout the Borough to discuss waste collection issues. These to include all parish councils and residents groups, local public drop-ins, viewpoint surveys and a feature in Stockton News and the local media.	J McCann	Summer 2007
4	That the Environment and Regeneration Select Committee schedule into its work programme an analysis of the impact of alternate weekly recycling and refuse collection in Redcar and Cleveland one year after its introduction	J McCann	?
5	That following extensive consultation, the Environment and Regeneration Select Committee reconsider the issue of alternate weekly recycling/refuse collection and report back to Cabinet with definitive proposals for any specific trials	J McCann	Summer 2007

6	A 'bin amnesty' to be applied to households using two 240-litre wheeled bins. Bins should be recalled through a series of promotions via the local media, Stockton News and the website, with a Freefone number and e-mail address provided. Refuse collection teams should also be asked to report where more than one bin is being presented for collection by a household.	J McCann	To coincide with any service changes after Summer 2007
7	Recalled bins to be cleaned and recycled for re-use.	J McCann	After summer 2007
8	Larger families of 6 or more members and those who generate additional residual waste because of disability to be provided with a 360-litre wheeled bin upon request and following needs assessment.	J McCann	After summer 2007
12	That the possibility of additional charges for hazardous waste be considered by the Environment and Regeneration Select Committee once the full extent of the W.E.E.E. legislation is apparent.	J McCann	Unknown
14	That waste kits, comprising the following containers, be provided at all new homes as appropriate: 240 litre wheeled bin Recycling box and bag Composter Information leaflets promoting home composting and recycling/waste reduction techniques, locations of recycling facilities and Care For Your Area services	J McCann	Apr-06

<b>15</b>	That developers be requested to provide either the kits outlined above, or provide a financial reimbursement to the Council, who will retain responsibility for provision and management of the kits.	J McCann	Jun-09

Evidence of progress - 11/12/06	Evidence of Progress (Include Dates)
<p>Service delivery for the 2006 growing season has now been operational since Easter 2006. Approx. 36,000 properties have been included in the 2006 scheme. Arrangements for 2007 will be scheduled in late 2006, with collections being expanded to around 48,000 properties. The remainder of the properties with gardens will be added in 2008/09. This will cover majority of properties with gardens. Home composting will be actively encouraged in those areas with gardens where the kerbside collection of green waste is not offered.</p>	<p>All properties with a garden receiving a green waste collection service from April 2007</p>
<p>Consultation via 4 Area Partnership Boards and SCRGA has now been completed. Presentations were made to the meetings between November 2005 and January 2006. It is on the consultation plan to consult on the waste and recycling issues as covered by this report. Following the evaluation of the trial collection of plastics and cardboard, public drop-in sessions will be arranged by Care For Your Area, with Parish Councils being kept informed and articles published in Stockton News.</p>	<p>Trial now complete and evaluated. Very popular and successful trial. Cabinet approved the roll out of the service to all households which will be done following further cabinet report on proposed implementation. Article in June Stockton News giving feedback on trial.</p>
<p>This update report will be scheduled into the work of the Environment and Regeneration Select Committee in consultation with the Chair.</p>	<p>Recent Env select report on Waste Management completed as part of this update</p>
<p>There are no proposals to progress specific trials of an alternate weekly collection service at this stage. Prior to any consideration of alternate weekly collection the following stages will be followed: A report of the findings of consultation with Redcar and Cleveland will be reported back to the Environment and Regeneration Select Committee Full analysis and financial appraisal of the trial of kerbside collections of plastic and cardboard. Full consultations on any proposal to implement a change in service delivery to alternate weekly refuse collection</p>	<p>This formed part of the Recent further Environment select Report. No plans at present to implement Alternate weekly collections</p>

<p>Preparations are being made for an Amnesty to be held including a specific Members' Bulletin, website and press releases, articles to be placed in appropriate edition of Stockton News. Operational Managers, Supervisors, Contact Centre Staff, Refuse crews all to be briefed and provided with information in accordance with the Cabinet recommendation. This will be introduced incrementally, i.e. as areas are covered by the green waste scheme and receive a plastic and cardboard collection service.</p>	<p>Bin amnesty' to be introduced incrementally in 3 phases to coincide with the roll out of plastic &amp; cardboard collections and introduction of no side waste policy - October 2008 phase 1, April 2009 phase 2 and October 2009 phase 3. Full education strategy developed to target specific areas within each phase. Households with more than 1 wheeled bin will be contacted and additional wheeled bins collected, Larger families of 6 or more members and those who generate additional residual waste to be provided with a 360L wheeled bin upon request following a needs assessment</p>
<p>To be undertaken in conjunction with recommendation number (vi).</p>	<p>October 2008 phase 1, April 2009 phase 2 and October 2009 phase 3. Full education strategy developed to target specific areas within each phase</p>
<p>To be undertaken in conjunction recommendations <i>vi</i> &amp; <i>vii</i>. Procedural guides and Contact Centre Staff briefed.</p>	<p>October 2008 phase 1, April 2009 phase 2 and October 2009 phase 3. Full education strategy developed to target specific areas within each phase</p>
<p>To be noted only at this stage. Still awaiting full WEEE legislative implications. Legislation once again deferred by DEFRA with full implementation of EC Directive into UK law unlikely until late 2007.</p>	<p>No plans at present to implement specific charges for WEEE although charges apply if collected through the Bulky Waste Collection Service</p>
<p>Development Control officers will be made aware of the contents of the waste kits as suggested in the list contained at <b>Appendix A</b> and developers will be <i>requested</i> to provide them. This is not a mandatory requirement, and for those developers willing to provide such items, will form part of a Section 106 Agreement / unilateral undertaking attached to the relevant planning consent. In lieu of providing such a kit, developers may also wish to consider financial reimbursement to the Council, who will retain the responsibility for provision and management of the kits. This addresses recommendation 15 of the Cabinet report:</p>	<p>Noted, officers are aware, and it is ongoing process.</p>

<p>Further to recommendation 16, it is not possible under the existing system of Local Plans to implement such an SPG because there is no policy basis for it. However, under the new Local Development framework the appropriate policy basis will be developed and a Supplementary Planning Document (SPD) on Planning Obligations, which will incorporate requirements for recycling facilities in new developments, is scheduled for preparation in 2007. Development Control policies will also be contained within the Core Strategy, and these will be broad policies which will indicate the Council's requirements, reflecting also the recommendations of the RSS. The Core Strategy is currently under preparation, and final adoption is not due until June 2009, although it will carry some weight in decision making as it progresses through the process of preparation.</p>	<p>The SPD on Planning Obligations was adopted on May 13 2008 and is now used in negotiations, and the Core Strategy will now be adopted in December 2009, not June, and you are involved in this</p>
