Traveller Transit Site Selection

Chair's Update to Executive Scrutiny Committee – 4 March 2008

Update on Progress (including issues/problems/successes)

At a meeting of 31 January, the Committee considered the results of the consultation on the proposed site of land adjacent to Bowesfield Pumping Station. Following this the Committee decided that the site was not suitable and therefore that there were no suitable sites within Council ownership. It was recommended to Cabinet that the terms of reference for any future search should be widened to include sites outside of Council ownership.

Timescale for Review

The Committee's report was presented to Cabinet on schedule at a meeting on 14 February.

Monitoring

There are no upcoming monitoring reports due for this Committee.
