

## **Environment Select Committee**

### **Update to Executive Scrutiny Committee – 28 July 2009**

#### **Review of Carbon Management**

##### **Update on Progress (including issues/problems/successes)**

The Committee has met twice to take evidence for this review. Members received initial baseline information that raised a number of issues including the contribution made by community centres and schools.

In order to gather more detailed information the Committee then met officers with responsibility for schools, and architects.

The next meeting (3<sup>rd</sup> August) will investigate the contribution that can be made by information technology services to carbon reduction.

The Committee is still to plan a site visit to premises promoting good carbon management.
