Subject: New cars tinted windows

Hi something to bring to your attention please and to take in consideration for all new vehicles being produced - a H/C driver has purchased a vehicle in the mindful thought that he would be able to buy plain rear windows to change them so he can put the vehicle on as a hackney Carraige - but to his surprise he can't as he has gone to the main dealers who have stated to him that they don't make plain glass windows for the rear windows on this make and model they will be factory standard throughout this make and model as will most new vehicles produced over the last three years. Other councils such as Middlesbrough have took this in consideration due to the manufacturers advice and is allowing vehicles to be plated in Middlesbrough.

I would like this similar approach in good work ethics from Sbc council please to maintain good working standards.

This is the vehicle in question

Thank you - regards - Tahir Ali - SHCDA
