

Self harm and Suicide

Suicide Prevention & Self harm

National Policy Context:

Preventing Suicide in England – cross government launched 2012

No Health Without Mental Health – cross government mental health strategy launched 2011

Risk Factors:

Children:

- Those who experience negative parenting or who have suffered child abuse
- Those who are in contact with the youth and adult criminal justice system
- Those underachieving at school
- Child poverty
- LAC, early school leavers and young lesbian, gay and bisexual people

Adults:

- Multiple factors
- Ethnicity
- Prisoners
- Asylum seekers
- Veterans
- Carers, friends and family members

Suicide 100 times more likely to occur 12months after self harm episode

Across the lifecourse

- Child mental health is impacted by adult mental health e.g. Stockton has a higher % of adult depression (17.28%) than England (11.68%) (2011/12 data)
- Marmot – ‘give every child the best start in life’
- Importance of **cognitive development** in children, including **bonding & attachment** in early years
- Impact of social inequality on health and wellbeing

Local Audit

- Completed by the Suicide Prevention Team based in TEWV NHS FT
- Data collected since 1997
- Reports based on date of death not registration
- Includes deaths <age 15 (ONS 15+)
- Looks at more verdicts than just took own life and open (undetermined) recognising the individual ways coroners work
- Since 2011 early alert system implemented with coroners to allow for 'real time' alert to potential deaths by suicide across Teesside

In development

- HNA Children & Young People's mental health
- Tees Children and Young peoples emotional wellbeing and mental health strategy
- Mental Health Partnership- Suicide sub group
- Targeted training self harm
- VCS public health and CCG grant- MIND
- Current work to identify settings for CAMHs delivery in the community
- Signage for hotspot areas

Stockton-on-Tees
BOROUGH COUNCIL

Health and Wellbeing

Big plans for the health of our people

Challenges

- Access to services (waiting lists , YP)
- Lack of Variety of services (duplication & gaps)
- No single coordinated 'offer'
- Schools express significant need in their pupils for MH & wellbeing support
- Data often not routinely collected / reported by services
- Dynamic changing economic landscape
- Lack of understanding of the numbers who self harm
- Stigma around self harm and suicide
- **Suicides are complex no one organisation can directly influence them all**
- **Engagement with the suicide prevention action plan**
- self-harm - increased admission rates for children higher than the national average
- working across all commissioners (CCG, NHS England, LA, LA Public Health, Education)
