

**APPENDIX 5**  
**Progress Update – Review of FASD**

No.	Recommendation	Responsibility	Date	Evidence of progress Presented to Committee on 19 December 2016	Assessment of progress Categories 1-4	Evidence of progress Presented to Committee on 19 June 2017	Assessment of progress Categories 1-4
2	The Council should build on previous work and undertake to raise awareness of FASD in Stockton utilising all relevant methods, including:						
	d) promoting and monitoring use of the FASD Animation	Aishah Waithe/Public Health Team	March 2017	A follow up survey using 'objective' (council online consultation programme) is currently being developed to assess impact of the animation and broader partners will be engaged over the coming months.	2 – On Track	Partially slipped due to changes in workforce which has moved timeframe forward. Progress includes planning meeting with Education Improvement Service to embed FASD animation in the secondary Risk Taking Behaviour Toolkit and wider refresh of the content of the toolkit. Work continues to expand use of animation and survey with wider partners.	3 – slipped due to change in workforce but no further barriers identified.
5	Committee supports participation in the Regional FASD Research Project, and Public Health should consider the results in due course	Public Health Team to liaise with those carrying out the study	March 2017	Funding has been allocated to the FASD research by Public Health and contracts signed to commence the screening of blood samples as part of the first stage of the research. No results have been received as yet.	2 – On Track	Funding has been allocated. Public health team are waiting for results of study to be written up and shared.	2 – on track

6	Ensure FASD prevention is reflected in the development of the revised Alcohol Strategy for Stockton-on-Tees	Aishah Waithe/Mandy MacKinnon	March 2017	A multiagency 'Alcohol statement of intent' has been produced which identifies increasing awareness of FASD and raising awareness of alcohol harm as key actions for the borough. FASD prevention is a key theme in internal PH action plans.	2 – On Track	The multi-agency partnership led by the police meets bi-monthly to develop the alcohol strategy. The statement of intent forms the basis of the work of the multi-agency partnership. Support is currently being sought via Adults Partnership to help drive the development of the strategy.	3 – slipped due to changes in personnel involved in Alcohol Strategy Group no further barriers identified.
