

PLANNED REPORTS

1. A schedule of planned reports is attached as Appendix A.
2. It is proposed not to add additional issues at this stage, unless anything pressing is identified by members of the Partnership, since we are at the stage of assessing the impact of merging the two previous Partnerships on the length of agendas and meetings.
3. Performance reporting for the DAT is generally likely to be one further meeting 'in arrears' than the rest of the performance reports because of the structure of the national reporting system.
4. It is **RECOMMENDED** that members of the Partnership consider the schedule, offer any comments, and agree the contents.
