

Merger Process

1. As discussed at the last meeting of the DAT Steering Group on 24 February, and the last meeting of the 'old' Safer Stockton Partnership on 17 March, it is proposed to support the merger process by updating the Induction Pack for members of the Partnership, and it is proposed to hand out hard copies of this latest version in conjunction with this agenda item (and to email copies to those not present). The Induction Pack will also be made available to download from the Partnership website www.saferstockton.com.
2. It is recognised that there will be a few members of the Partnership who will not be familiar with other representatives and their agencies. It is therefore proposed to include an item on the agenda for the next meeting, on 16 June, at which each member of the Partnership can provide a 2 minute input on their role in relation to the Partnership (e.g. who they represent, what they are interested in, links they can provide to other bodies etc).
3. Views of members of the Partnership are sought on this proposal or any alternative means of facilitating the merger process.
