

The Partnership Strategic Assessment 2012 recommendations

Detailed below are the final proposed recommendations for the forthcoming Strategic period:

1. To merge the current elements of the Alcohol Crime and Disorder Group into the existing Violence Tactical and Reducing Reoffending groups to effectively tackle alcohol crime and disorder.
2. Assess and analyse A & E data from NT&H Hospital on alcohol related assaults that is missing from this strategic assessment, and to consider whether males are under reporting violence.
3. Continue with the first time offender's research during the next strategic period and explore what additional measures can be put in place to support offenders and prevent repeat offending. In addition to this it is recommended that an additional piece of analysis is brought to a future SSP meeting exploring whether there continues to be an increase in first time female shoplifting.
4. Assess all current targets within the Community Safety Plan and re-set for 2013-14.
5. Continue to provide problem profiles and more in-depth analysis for specific issues throughout the year including alcohol and shoplifting.
6. Establish an operation task group for Domestic Violence to further assess repeat victims of DV and to fully utilise the DV Conferencing group and existing procedures.
7. To monitor the people aged between 18-19 years who present to adult drug and alcohol treatment services and adopt a partnership approach at understanding their previous history of substance misuse. In addition to this understand their previous and current engagement with any young people's service to identify any potential gaps in the early identification of substance misuse by these young people.
8. To increase the number of people aged 18-25 who engage in alcohol treatment as a result of a referral made following an arrest.
9. Continue to prioritise offenders committing burglary and shoplifting offences as they have the highest rate of repeat offending:

It is **RECOMMENDED** that the Safer Stockton Partnership approve the recommendations for this strategic period.
